PROGRAMS

Stable and secure services: NPower assesses the state of current information technology, advises on technology solutions that fit organization needs, assists in budget planning, and identifies staff training needs. The team also builds, repairs and maintains networks and makes regularly scheduled maintenance visits. NPower members can access HelpDesk Operations during business hours.

Efficient and effective services: NPower designs and hosts Web sites, creates databases, and develops electronic marketing and communication tools. The team teaches not-for-profit staff how to update and add to Web sites without relying on outside designers. Technologists work with organizational leaders to create and fully use databases for a variety of needs.

Assessment and planning: Helps minimize technology-related crises, uses staff time efficiently, and avoids wasting money on equipment.

FUND-RAISER

The inaugural Byte Night will be Feb. 26, 2010, at The Children's Museum of Indianapolis. Corporate sponsors are supporting the event, which will focus on awarding significant technology makeover packages to three not-for-profit organizations.
